6000 SERIES

CULTIVATORS

Setting the Standard for Excellence in Conservation Tillage.

Buffalo® 6300

YOU GET MORE THAN PRODUCT PERFORM

Standard 6000 Features

- Unequaled toolbar height allows more crop clearance and residue flow.
- High toolbar and row beam design give desired crop clearance while providing maximum soil and residue flow.
- Easy access with 4" x 6" main frame mounting tube.
- Wider, longer, and tougher parallel linkage with greaseable, precision-ground, one-inch parallel linkage pins and composite bushings that provide strength and lasting durability.
- Individual row quick-adjustable depth control.
- Quick-adjust, self-locking screw jacks instead of cranks provide quick and accurate depth settings with positive, quick-set, single-wrench adjustment.
- Long-life, DURA-FACE™ sweeps. DURA-FACE™ coating on the edge and neck provide longer wear and durability.
- Large, single sweep for easy residue flow.
- Strong, heat-treated sweep shanks that have unmatched durability.
- Adjustable sweep mounting brackets allow fine tuning of the sweep pitch for superior soil penetration and flow.

The Buffalo Cultivator has to be tough
