

CHICKEN TRACKER MOUNTING INSTRUCTIONS

John Deere Drills & Older White Planters (4" TINES)

(Read Instructions Completely before Beginning Installation)

Before working on your planter or drill

DANGER: When storing or working on the planter or drill always install cylinder stops or place the planter or drill on stands to prevent personal injury or damage to the attachments.

Mounting Instructions

Before you begin, verify all items listed in the "package contents" table at the right.

- Step #1: Remove the original press wheel from your planter or drill.
- Step #2: Put the Chicken Tracker wheel in the place of the original wheel. Tines can be directed either way, but we recommend they run as shown below (tips down when viewing from the back of the planter).
- Step #3: You may need to insert washers or spacers on the inside of each wheel. Insert the original bolt back through the drill and Chicken Tracker. Tighten.

Chicken Tracker Package Contents (per single row)
