

IMPROVED JOHN DEERE GAUGE ARMS

BY COYOTE MACHINING

FITS JOHN DEERE 1720 OR NEWER, MUST HAVE 16MM BOLT

Upgrade your John Deere gauge wheel arms with sealed bearings. Either send in your worn out arms for repair, or send them in for exchange. We will install new sealed bearings, provide shim kits, and build up the worn out spot on the arms. This improvement lets the gauge arms move freely, stay in adjustment, and get rid of the side slack.

*Our improved gauge arms have been in use for 6 years and are still like new.
Patent Pending.*

BENEFITS OF IMPROVED JD GAUGE ARMS

- 1/3 more sealed bearing surface in each arm.
- Arms pivot smoothly & stay tight.
- Never grease again!
- Less chance of mud building on inside of gauge wheel.
- Eliminates side movement & tire wear.
- Arms are still like new after 6 years, planting Over 24,000 acres!

WE BUY USED JOHN DEERE GAUGE ARMS

ARMS ON OUR [YOUTUBE!](#)**

Improved arms fit John Deere 1720 or newer, must have 16mm bolt.

Coyote Machining Improved!

Jeff S., Coyote Machining-

Coyote Machining rebuilds John Deere Gauge Arms. Our customers can get their own gauge arms fixed or can exchange them. John Deere Gauge Arms are susceptible to consistent maintenance due to dirt build-up, loosening, and adjustments. With Coyote Machining, we improve the gauge arms so they are practically maintenance-free! Two bearings replace the old, and are pressed into the arm. This keeps it tight allowing it to move freely without grease or readjustment. Your finished gauge arm will come with a shim kit to reinstall (see below). Our customers have high satisfaction in our product—our farmers going 5-6 years, & counting, without issues.

Machined Arm, Shim Kits,
& Bearings Provided

In this cut-out arm, you can see how the improvement with the bearings look inside the arm
