

HOSE HOLDER MOUNTING INSTRUCTIONS

for Case IH Planters & Case IH Soybean Special Drills

Before working on your planter or drill

DANGER: When storing or working on the planter/drill, always install cylinder stops or place it on stands to prevent personal injury or damage to the attachments.

WARNING: Do not roll back or back up the planter/drill in or on the ground as this can result in damage to the Rebounder.

PLEASE: Read instructions completely and verify all package contents before beginning installation.

Hose Holder for **CASE IH 1200-2100** & Case IH 5400-5500 Soybean Special Drills

PART # **HH12** Package Contents (per single row)

Item	Quantity
3/8" Clear Hose	1
1/4 Black or Gray Hose	1
Metal Plate	1
12 x 3/8" Phillips Screws	2
Size 5 Small Tie Strap	1
Instruction Sheet	1

OR

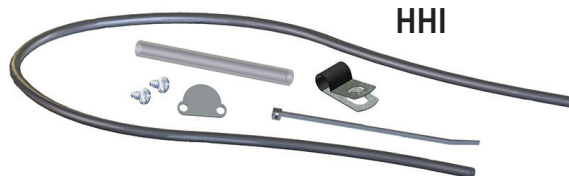

Hose Holder for **CASE IH 800-955**

PART # **HHI** Package Contents (per single row)

Item	Quantity
3/8" Clear Hose	1
1/4 Black or Gray Hose	1
Metal Plate	1
12 x 3/8" Phillips Screws	2
Size 5 Small Tie Strap	1
1/4" x 1/4" Tube Clamp	1
Instruction Sheet	1

! IMPORTANT POINTS !

- The holder in this kit acts as a guide keeping the disc from rubbing on the 1/4" fertilizer or chemical hose.
- The Hose Holder must be mounted to the Rebounder before the Rebounder is attached to the seed tube.
- **DO NOT STRAP ANY LARGE TIE AROUND ANY PART OF THE HOSE.**
The hose must be able to flex independently with the Rebounder.

#1 Slice through one side of the short piece of clear plastic hose (lengthwise), then place it over the 1/4" orange hose about 2" from end of 1/4" hose.

#2 Run the tubing through the raised area that holds the screws and the hole in the molded-in tab at the end of the Rebounder. **Extend the hose past the end of the Rebounder tip approximately 3/8".**

#3 Place the screws in the metal plate, over the clear hose that is over the orange hose and screw the metal plate down to the Rebounder to hold the hose in place.

#4 Attach Rebounder to the seed boot following instructions on Page 2 and *Rebounder Mounting Instructions* for your planter or drill type.

HOSE HOLDER MOUNTING INSTRUCTIONS

for Case IH Planters & Case IH Soybean Special Drills

- #4:** Follow instructions on other side to assemble the Hose Holder and attach it to the Rebounder.

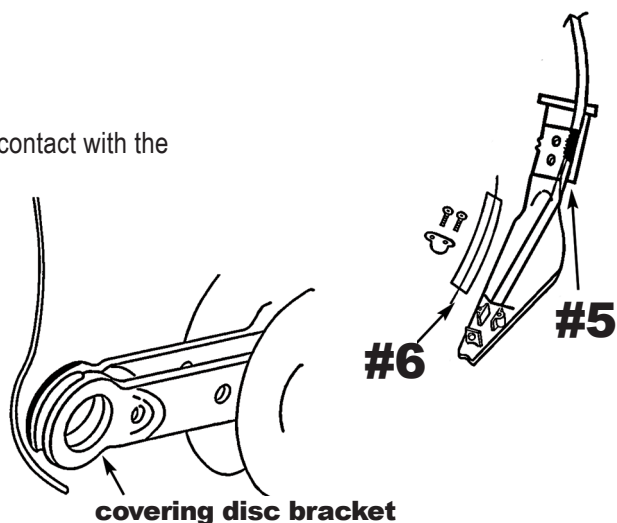

See your planter or drill's *Rebounder Mounting Instructions* for attaching Rebounder to the Case IH seed boot.

CASE IH 1200 2100 PLANTERS & 5400 5500 SOYBEAN SPECIAL DRILLS

HH12

- #5:** Thread the hose up inside the Case IH seed boot.
- #6:** You might have to shorten the clear hose so it doesn't come in contact with the covering disc bracket.
- #7:** Put a small tie strap around the clear hose to hold it in place.
- #8:** Clear hose should be cut off to within 1" of the covering disc, pivot so that the Rebounder can flex without jamming the clear hose into the pivot casting of the covering disc.

CASE IH 800 900 950 955 PLANTERS

HHI

- #5:** Remove covering disc bolt from seed boot and slide housing out of seed boot enough to use a grinder to bevel the covering disc bracket for the 1/4" fertilizer hose.
- OR**
- Remove covering disc bracket and grind a shallow groove in the center of the bracket so the fertilizer hose can lay in the groove and not be crushed.
- #6:** Use the tie strap to hold the hose to the seed tube—leave it loose. This prevents it from touching the disc. Make sure the hose can flex with the Rebounder.
- #7:** Place the 1/4" tube clamp to the bolt that holds the Rebounder.
