

# REBOUNDER OPTIONAL FITTING

**F**ertilizer placement in relation to the seed is the key to successful plant growth.

When it comes to in-furrow fertilizer application, we have the solution. Whether you want to split the fertilizer or place it directly on the seed, we have many options for you to choose from.

To accommodate your specific needs, each Rebounder has the option of allowing liquid fertilizer to be applied in various locations in relation to the seed.

We recommend you consult with your agronomist on which fitting will work best for your agricultural program.

## IT'S A FACT:

Plants require 14 essential nutrients for healthy growth. The absence of any one nutrient in the soil can limit plant growth, even when all other plant nutrients are present in adequate amounts.

The three micro-nutrients that are essential for food production and quality are nitrogen, phosphorus and potassium.

### Y-NOT SPLIT-IT®

- ▶ Fertilizes sidewalls of seed V
- ▶ Ensures that the seeds won't be drenched
- ▶ Apply up to 10 gallon in-furrow
- ▶ Less than 5 minutes to install

**NEW Y** has half size holes for placing lower volumes of fertilizer on the side walls

### STRAIGHT SHOT™

- ▶ Places liquid directly with the seed from under the Rebounder
- ▶ Keeps liquid off wheels and discs
- ▶ Secured with metal plate
- ▶ Works with planters and drills

### HOSE HOLDER™

- ▶ Places liquids on the seed
- ▶ Keeps liquid off discs of planter or drill
- ▶ Hose is secured with molded-in tab
- ▶ Distributes liquids evenly in-furrow

# JD DRILL OPTIONAL FITTING

## STAINLESS STEEL TUBES

- ▶ Works with Rebounders, planters and drills
- ▶ Effective liquid placement
- ▶ Durable, rust-free stainless steel
- ▶ Easy installation
- ▶ Great for starter application

*Chad's  
Tube™ for  
John Deere*

## BENEFITS OF TUBE OVER THE PRESS WHEEL

- ▶ Places fertilizer behind the press wheel for a cleaner drill
- ▶ Rebounder's concave design places all the seeds in the bottom of furrow
- ▶ The press wheel presses seeds in before fertilizer is placed above the seed
- ▶ Bracket models fit the 9" (SDX & JD type) press wheel

*JD 750 Have 10" press wheels. We sell 9" wheels for replacements.*

*Tube for John Deere  
9" Press Wheel*
