

PUMP SYSTEMS

GX2 Double Pump Distribution Center

The Schaffert fertilizer application system is uniquely designed and assembled to meet individual customer needs.

At the heart of our pump systems are the GX1 and GX2 distribution centers. The GX1 contains a single pump and the GX2 has dual pumps. The number of pumps needed is determined by the implement's size and desired fertilizer application rate.

J.G., TX-

I like the idea of being able to adjust the volume accurately in the cab and the charts you send are very easy to read and use. Also setting the system up was a cinch.

GX1 Single Pump Distribution Center

WORKS GREAT FOR

- ▶ 2x2 solutions for high-volume nitrogen G2 and 2x2 tube
- ▶ In-furrow starter, fungicide, & insecticides Rebounders, Optional Fittings, or Stainless Tubes

FEATURES—BENEFITS

- ▶ Customized for your needs
- ▶ Easy adjust controller
- ▶ Factory assembled
- ▶ Made in the USA
- ▶ Bolt & go!

STANDARD KITS INCLUDE

- ▶ Pump(s) & filters
- ▶ Manifold & distribution center
- ▶ Fertilizer placement options
- ▶ Controller & wiring harnesses
- ▶ Automatic shut-off

Manifold option #1: PVC piping

Manifold option #2: Visual Wilgers

Stainless steel ball Check Valve (very dependable)

5.3 GPM REMCO pump

View your pressure from in the cab with the Magmount Pressure Gauge

Magmount (100# pull) Run/Hold Switch

ManX Controller

The ManX (manual rate controller) is a simple, durable, yet highly effective solution for those wishing to have complete control. Producers enjoy the ease of use and simplicity built into the ManX Controller. The ManX will handle two pumps at once.
