

CLOSING\PRESS WHEEL STOP MOUNTING INSTRUCTIONS

John Deere 1560 - 1990, ProSeries Drills & Air Seeders

Before working on your planter or drill

DANGER: When storing or working on your drill always install cylinder stops or place the planter on stands to prevent personal injury or damage to the attachments.

PLEASE: Read instructions completely and verify all package contents before beginning installation.

- Lefts & Rights.
- Fits 9" & 10" press wheels.
- **10" PRESS WHEELS** will need an extra bolt & nut or welded keystick to hold press wheel arm further up.
- During transport, this stop will prevent the closing wheel from hitting or resting on the press wheel and prevent the press wheel from hitting or resting on the Rebounder.

JD Drill Closing\Press Wheel Stop for 9" Press Wheels

Package Contents for part #:

1	Instruction Sheet

JD Drill Closing\Press Wheel Stop for 10" Press Wheels

Package Contents for part #:

JDDSTOP10L / JDDSTOP10R

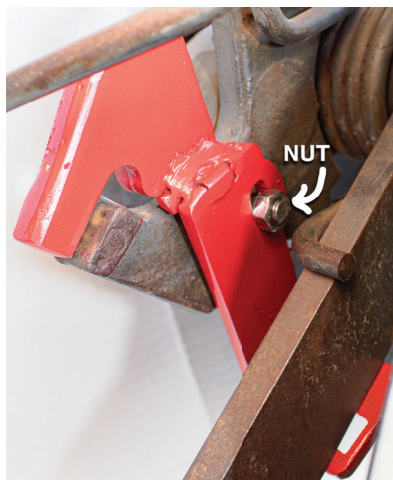

Qty	Item
1	Closing+Press Wheel Stop (L or R) with welded keystick OR bolt + 2 nut stack
1	Instruction Sheet

MOUNTING THE CLOSING WHEEL STOP

Using the original bolt and nut, install the **JDDSTOP** closing\press wheel stop so that it rests under the closing and press wheels as shown.

Note that there are **LEFT** and **RIGHT** side stops. Photos show a Right side drill unit.

For **10" PRESS WHEELS WITH BOLT STACK:**

Thread one nut onto the bolt. Put the bolt up through the bottom hole of the stop. Thread the other nut on to the bolt.

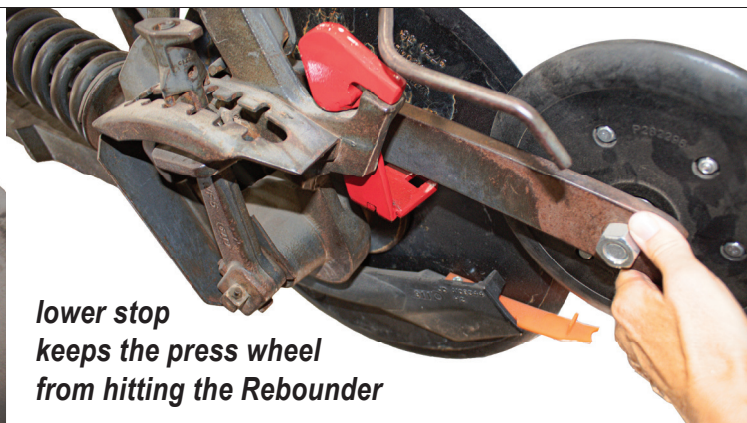

Raise and lower nuts for adjustment to ensure the press wheel arm is held higher up to accommodate the larger 10" press wheel. **OVER→**

CLOSING\PRESS WHEEL STOP MOUNTING INSTRUCTIONS

John Deere 1560 - 1990, ProSeries Drills & Air Seeders

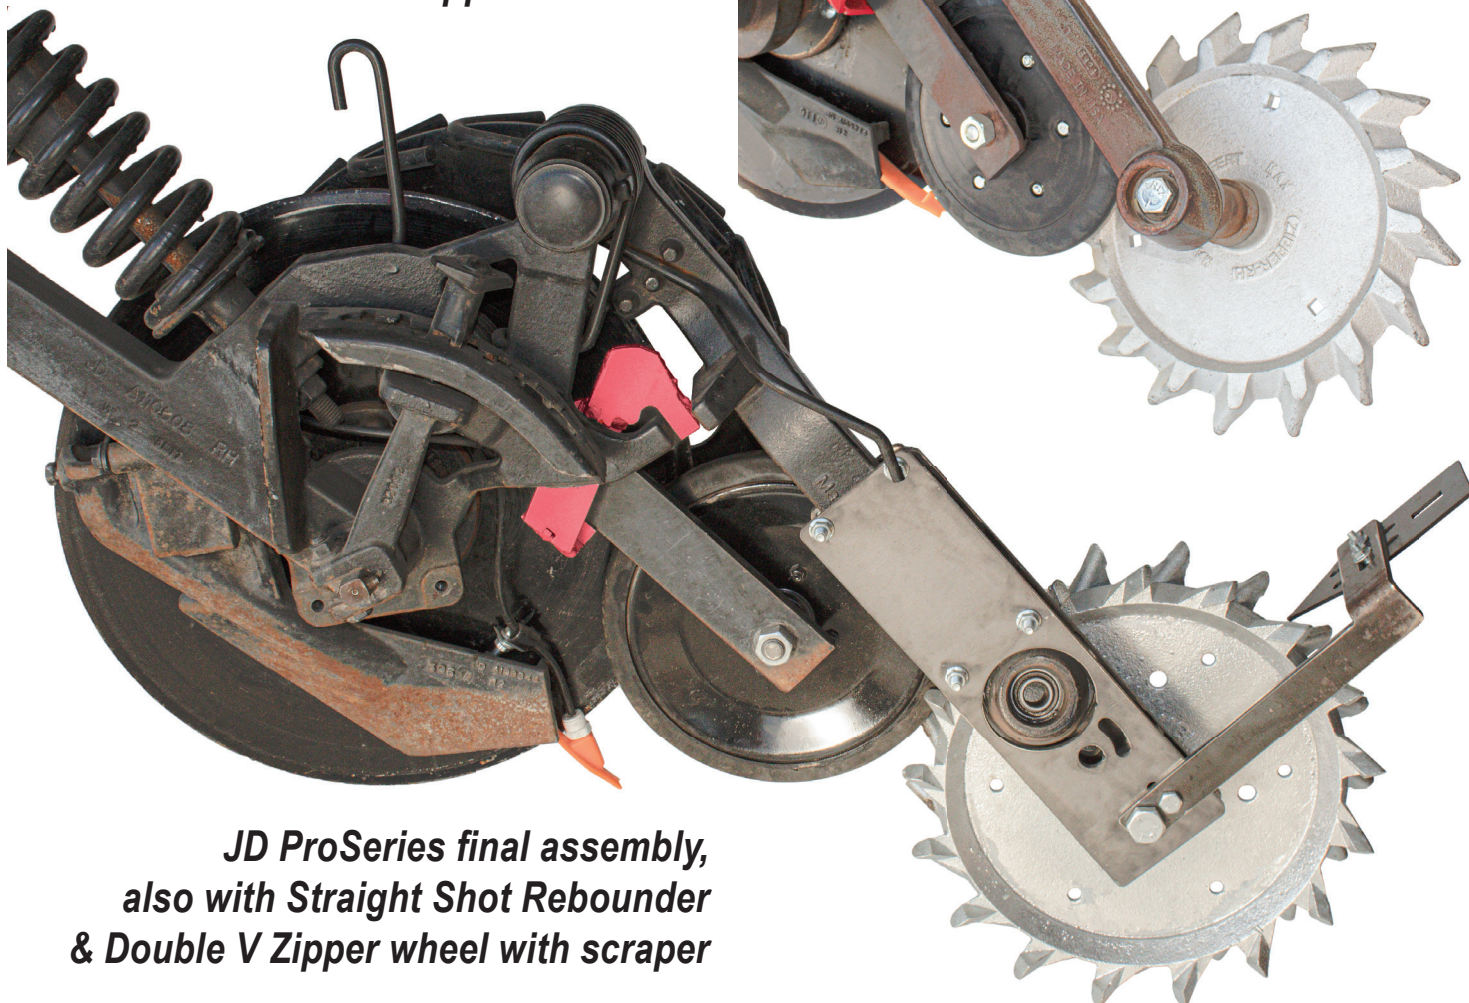

upper stop keeps the closing wheel from hitting the press wheel

lower stop keeps the press wheel from hitting the Rebounder
